

# Compact HE 2U power system

# The Flatpack S 2U system is designed with customer flexibility in mind.

This small power dense system is purely based on pluggable breakers and rectifiers and can easily be configured to fit your required application, even in field. The combination of Flatpack S HE rectifier and Smartpack S controller ensures safe, reliable and environmental friendly operation. The shallow depth makes it suitable for most cabinets and excellent as a replacement unit. And as it is all based on the well proven Eltek technology, the Flatpack S family is the key for future needs.
