

## Wide input DC/DC converters

The Flatpack2 DC/DC converters add new flexibility to the Flatpack2 power systems. Secondary 24V<sub>DC</sub> or 48V<sub>DC</sub> outputs can be provided from the main voltage battery. Application requiring galvanic isolation between the loads can now also be addressed.

The galvanic isolated CAN bus can be connected to a supplying Eltek power system's control system allowing monitor and control of the DC/DC converters without adding a separate controller.
