

Liebert® ITA2 10 - 30 kVA

Flexible power protection for Rack or Tower installation

HIGHLIGHTS

The Liebert ITA2 series is ideally suited for:

- Small computer rooms
- Integrated solutions
- Branch offices
- Servers
- Network computers and peripherals
- Storage device
- VoIP.

Product Features:

- **Rack-tower design** for installation flexibility
- Able to deliver both three-phase and single-phase output (10-20 kVA)
- Ultra **high power density**, thanks to 30% reduced dimensions compared to the previous generation
- 0.99 input power factor for **better grid or generator compatibility**
- Unity output power factor for **additional power availability**
- Efficiency in double conversion **up to 96.2%**
- ECO mode operation with efficiency up to 99% and **remarkable energy-saving performance**
- Powerful charging capability for **minimum battery recharging time**.

The UPS is compatible with any Building Management System (BMS) by offering the following communication features:

- Voltage-free contact ports
- USB interface
- Vertiv™ IntelliSlot™ for SNMP, Modbus or Relay communication
- Programmable output terminals (10-20 kVA).

Remarkable Efficiency and Flexibility characterize the Liebert® ITA2 UPS

Featuring true online double conversion technology, unity power factor and an extremely compact rack-tower design, Liebert ITA2 is the perfect power protection solution for your computer rooms, storage and network equipment.

Description

With a unity output power factor, Liebert ITA2 **perfectly matches the needs of modern IT loads**, and with its wide input voltage and frequency range it effectively reduces the need for battery intervention, thus **prolonging battery life**.

It is also endowed with intelligent fans with automatic speed control, which effectively **save energy and reduce noise**.

Liebert ITA2 supports common battery configurations between paralleled UPS and the number of batteries per string, which can be arranged flexibly, facilitating the utilization of different battery systems and **saving on battery investment**.

An extra powerful battery charger across all models capable of recharging high capacity battery strings ensures a **fast charge-restoration** even after a prolonged power outages.

Liebert ITA2 offers **enhanced flexibility** with a wide range of accessories for both stand-alone and rack-mount installations. When rack mounted, it allows to install up to 30 kVA UPS in just 3 U of space, achieving a remarkable space saving. Parallelability and maintenance are facilitated through the use of **dedicated maintenance bypass option** while extended backup time can be provided with **matching battery modules** for a neat rack-mounted installation.

Liebert ITA2 features a multi-lingual LCD user interface allowing close control and monitoring of system status and performance.
